Ideation Phase
Define the Problem Statements

Date	3rd October 2026
Team ID	SWTID-2026-4846
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement :

Problem Statement (PS)	We are (Customer)	We are trying to	But	Because	Which makes us feel
PS-1	Students and teachers of the school	Report IT problems such as Wi-Fi, projector, password or slow computer issues	We do not know which category to choose and we wait a long time for help	Tickets are sorted by hand and we get no message that our request was received	Worried and ignored
PS-2	The IT helpdesk staff	Sort many tickets every day and send them to the right place	It takes a lot of time and we sometimes choose the wrong category	We must read every ticket by hand and the number of tickets keeps growing	Tired and under pressure
