Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	3rd October 2026
Team ID	SWTID-2026-4846
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Ticket Creation	Enter only Caller and Short description Ticket number is made by Auto Number (INC...) Description, State, Assigned Group and Assigned To can be added if needed
FR-2	Custom Table and Fields	Create the table Incident WorkFlow Create fields: Number, Caller, Category, Subcategory, Short Description, Description, State, Assigned Group, Assigned To Add choices to Category, Subcategory and State
FR-3	Dependent Choices	Subcategory list depends on Category Network - Wi-Fi Hardware - Projector Access - Forgot Password Performance - Slow Computer
FR-4	Auto Classification (Flow Designer)	Flow starts when a ticket is created and Category is empty Wi-Fi or Network in Short description: Network + Wi-Fi Projector: Hardware + Projector Forgot password: Access + Forgot Password Slow computer: Performance + Slow Computer
FR-5	Email Notification	Send an email to the caller after the ticket is classified Subject: Your Request for the issue has been submitted
FR-6	Deployment	Set the Update Set to Complete Export the Update Set as an XML file and share it

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The ticket form is simple. Users only type the Caller and the Short description. Category and Subcategory fill in by themselves.
NFR-2	**Security**	Users must log in. ServiceNow roles and access controls decide who can see or change ticket data.
NFR-3	**Reliability**	The same keyword always gives the same result. Auto Number does not repeat. Required fields stop empty tickets.
NFR-4	**Performance**	The flow runs right after a ticket is created, so Category, Subcategory and the email are ready quickly. The keyword checks are simple.

NFR-5	**Availability**	The solution runs on the ServiceNow cloud instance, so it can be used whenever the instance is available.
NFR-6	**Scalability**	New keywords, categories and actions can be added in Flow Designer without code. It is easy to maintain.
